Portfolio: <https://azathanver.github.io/portfolio/>

PROFESSIONAL SUMMARY

Technical Support Engineer with **Nearly 3 years of experience** in product support, application support, OMS implementation, API troubleshooting, incident management, automation, and production operations. Hands-on experience troubleshooting cloud-based applications, analyzing logs, investigating REST APIs, working with SQL databases, and supporting implementation and rollout activities.

Currently working on **OMS Support & Implementation at WPP Media**, where I designed the workflow and API mapping for an automation solution that transformed a repetitive implementation process from approximately **9 people and 1 week to 3 people and 1 day**, enabling faster and easier rollouts.

Previously worked at **Netcore Cloud** as a Product Support Specialist and escalation point of contact, coordinating a **3-member support team** for complex issues, incident resolution, troubleshooting, and collaboration with development teams.

Strong working knowledge of **Python, SQL, REST APIs, Postman, Linux/Unix, Bash/Shell scripting, Selenium, Git, monitoring, log analysis, SFTP, networking, and cloud technologies**.

CORE COMPETENCIES

- Technical & Application Support
- Production Support
- Incident & Escalation Management
- Root Cause Analysis (RCA)
- REST API Troubleshooting
- API Testing & Integration
- OMS Implementation

- Process Automation
 - Linux / Unix Administration
 - SQL & Database Troubleshooting
 - Log Analysis & Monitoring
 - Python & Shell Scripting
 - System & Network Troubleshooting
 - Client & Stakeholder Communication
 - Team Coordination
 - SLA Management
 - Deployment & Rollout Support
 - Cross-functional Collaboration
-

PROFESSIONAL EXPERIENCE

WPP Media — Chennai, India

OMS Support & Implementation Engineer

Aug 2025 – Present

- Support and implement **Open Media Studio (OMS)** solutions based on client and business requirements, supporting implementation activities and successful rollouts.
- Troubleshoot OMS application issues, integration failures, configuration problems, API issues, and performance-related problems.
- Analyze application logs, API responses, system behavior, and data flows to identify issues and determine appropriate resolutions.
- Designed the **workflow and API mapping** for an automation solution that converted a highly repetitive OMS implementation process into a streamlined bulk-processing workflow.
- Reduced implementation effort from approximately **9 people to 3 people** through workflow automation and process optimization.
- Reduced the implementation cycle from approximately **1 week to 1 day**, enabling faster and easier rollouts.

- Mapped business operations to the appropriate APIs and defined the sequence and dependencies required to execute implementation activities.
- Automated repetitive implementation operations and reduced manual intervention during large-scale rollout activities.
- Work with REST APIs, JSON payloads, scripting, databases, and system logs while troubleshooting and implementing OMS workflows.
- Collaborate with development, QA, business, and other technical teams to investigate defects, validate fixes, and resolve integration issues.
- Support upstream and downstream integrations and investigate failures across different components of the application workflow.
- Maintain implementation documentation, troubleshooting procedures, and operational knowledge for recurring issues.
- Communicate technical issues, progress, and resolutions with relevant stakeholders during implementation and support activities.

Key Achievement

Designed an API-driven OMS automation workflow that reduced the implementation process from ~9 people over ~1 week to ~3 people over ~1 day, significantly improving rollout speed, operational efficiency, and ease of execution.

Netcore Cloud — Coimbatore, India

Product Support Specialist / Escalation POC

Nov 2023 – Jul 2025

- Provided technical and product support for a cloud-based platform used by customers to improve engagement, conversions, and retention across websites and applications.
- Served as an **escalation point of contact (POC)** for complex customer and production issues.
- Coordinated and provided technical direction to a **3-member support team** during escalated incidents and complex troubleshooting activities.
- Investigated application issues using troubleshooting, log analysis, API investigation, SQL queries, system behavior, and root-cause analysis.
- Managed escalated incidents from initial investigation through resolution, coordinating with development and higher-level technical teams when required.

- Prioritized issues, assigned investigation activities, tracked progress, and ensured incidents were handled within applicable SLA expectations.
- Worked with development teams to reproduce issues, provide technical findings, communicate impact, and validate fixes.
- Performed product testing and validation to identify defects and potential product improvements.
- Supported product releases, patches, and updates while helping minimize customer impact.
- Monitored product behavior, customer feedback, and recurring incidents to identify trends and areas for improvement.
- Troubleshoot issues involving APIs, databases, application behavior, networking, logs, and system integrations.
- Created and used scripts to automate repetitive support and operational tasks.
- Communicated technical findings and resolutions to customers and internal stakeholders.
- Contributed to improving support processes, troubleshooting procedures, and knowledge documentation.

Leadership Achievement

Acted as escalation POC and coordinated a 3-member support team, providing technical direction for complex incidents, troubleshooting, prioritization, and resolution.

SELECTED AUTOMATION & TECHNICAL PROJECTS

OMS Implementation Automation — WPP Media

Technologies: REST APIs, Python, JSON, SQL, Scripting, Automation

- Analyzed a repetitive manual OMS implementation workflow and identified opportunities for automation.
- Designed the workflow and mapped individual business operations to their corresponding APIs.
- Defined the execution sequence and dependencies required to complete the implementation process.

- Automated bulk implementation activities that previously required significant manual effort.
 - Reduced the required team effort from approximately **9 people to 3 people**.
 - Reduced execution time from approximately **1 week to 1 day**.
 - Enabled faster, simpler, and more consistent implementation rollouts.
-

Automated Log Fetcher

Technologies: Python, Linux/Unix, Shell, SSH, Log Analysis

- Developed an automation script to identify the server handling a process and retrieve the relevant logs.
 - Automated login sessions across multiple servers based on the number of servers involved.
 - Reduced manual effort and time required to locate and collect logs during troubleshooting.
 - Improved the efficiency of investigation and incident-resolution workflows.
-

Spreadsheet Data Downloader

Technologies: Python, Google Sheets, File Transfer, Automation

- Developed a Python automation to retrieve data from Google Sheets.
 - Automated downloading and transferring the required data to a server.
 - Reduced repetitive manual data-transfer activities.
-

Automated File Approval

Technologies: Python, Selenium, Web Automation

- Automated a web-based workflow for validating data and approving eligible files.
 - Reduced repetitive manual verification and approval activities.
 - Improved consistency of the validation and approval process.
-

TECHNICAL SKILLS

Programming & Scripting

Python, Bash, Shell Scripting, Java, JavaScript

APIs & Integration

REST APIs, API Testing, API Troubleshooting, Postman, JSON, API Integration, SFTP, SMTP

Databases

SQL, MySQL, PostgreSQL, PSQL, SQL Workbench, Database Troubleshooting

Operating Systems

Linux, Unix, Windows, SSH, Server Troubleshooting

Automation

Python Automation, Shell Automation, Selenium, Cron Jobs, Task Scheduler, Bulk Processing, Workflow Automation

Cloud & Infrastructure

AWS, GCP, S3, Cloud Application Support, Basic Cloud Operations

Monitoring & Observability

Datadog, Kibana, Grafana, Log Analysis, Application Monitoring

Networking

Networking, VPN, SSH, SFTP, SMTP, Server Connectivity Troubleshooting

Development & Collaboration

Git, GitHub, Jira, Postman, VS Code

Support & Operations

Technical Support, Application Support, Incident Management, Escalation Management, RCA, Debugging, SLA Management, Client Support, Production Support

EDUCATION

Karpagam College of Engineering — Coimbatore, Tamil Nadu

Bachelor of Engineering (B.E.) — Computer Science Engineering

2020 – 2024 | **GPA: 8.4 / 10**

CAREER HIGHLIGHTS

- **Nearly 3 years of experience** in technical/product support and implementation.
- Experience supporting **cloud-based applications and OMS implementations**.
- Designed API workflows and automation for large-scale implementation activities.
- Reduced OMS implementation effort from **9 people to 3 people**.
- Reduced implementation time from approximately **1 week to 1 day**.
- Coordinated a **3-member technical support team** as an escalation POC.
- Hands-on experience with **REST APIs, Postman, Python, SQL, Linux/Unix, Bash, Selenium, Git, monitoring, and log analysis**.
- Experience troubleshooting production issues and working with development, QA, business, and customer-facing teams.
- Experience automating repetitive operational and support processes.
